

EXCERPTS FROM TEACHING EVALUATIONS

- (1) Prof. Raghuram was always prepared and made class enjoyable because I can tell he really loves Math and Teaching. He was always available for extra help which was very beneficial for my learning. (Fall 2003, Linear Algebra.)
- (2) Hands down the most engaging, most considerate, most prepared Math instructor I have had at the University of Iowa. He is an absolute credit to the Mathematics Department. (Fall 2003, Linear Algebra.)
- (3) Raghuram is the man! (Spring 2004, Calculus–II.)
- (4) Excellent class! Raghuram truly loves his job. Best math class I ever took. (Spring 2004, Calculus–II.)
- (5) This was one of the best courses I have taken in the Math department. Most of my instructors lecture, but do not take the time you do to ask questions and let us think up answers before moving on. I feel like you really *teach*. Thank you! (Fall 2004, Discrete Mathematics.)
- (6) Raghuram is an excellent professor who enjoys Mathematics and therefore makes the class interesting. He is always available for office hours and explains questions very well. He does a great job of relating topics in this class to other math courses for more understanding of Mathematics as a whole. (Fall 2004, Discrete Mathematics.)
- (7) Professor Raghuram did an excellent job teaching this course....I was recommended to take him for this course and will gladly recommend him to anyone else. (Fall 2004, Calculus–II.)
- (8) Dr. Raghuram's presentations are exceptionally lucid and clear. His lectures are easy to follow and he is truly interested in helping students learn. He is certainly one of the best teachers I have had at this university. (Spring 2005, Topics in Algebra: Representation Theory.)
- (9) Raghuram is by far the most influential teacher thus far in all my years of schooling.....he seemed to have the ability to teach calculus to a three-year-old! (Look under my name in the University of Iowa, in <http://www.ratemyprofessor.com>)
- (10) Raghuram is the best teacher in Maclean Hall and possibly the University. His name maybe scary but he is totally American now. Everyone can find things in common with him. (<http://www.ratemyprofessor.com>)

AVERAGES OF SCORES ON TEACHING EVALUATIONS

- (1) Spring 2005, Topics in Algebra: Representation theory: 5.96/6.0
- (2) Fall 2004, 22M:150, Discrete Mathematics: 5.85/6.0
- (3) Fall 2004, 22M:026, Calculus–II: 5.85/6.0
- (4) Spring 2004, 22M:026, Calculus–II: 5.80/6.0
- (5) Fall 2003, 22M:027, Linear Algebra: 5.84/6.0
- (6) Fall 2003, 22M:150, Discrete Mathematics: 5.78/6.0
- (7) Spring 2002, MA 265 Linear Algebra: 4.45/5.0
